C.C.F. Would Wreck Canada

Are you aware that a group of disgruntled men and women are spreading propaganda in all parts of our country with the professed purpose of destroying all existing processes of government in Canada?

This is a brazen attempt to secure control of our Canadian government by electing enough members to give them the balance of power at Ottawa, aiming to destroy all existing Canadian industries, traditions and institutions. They aim to destroy the painstaking labor of years of such Canadians as MacDonald, Laurier, Cartier and Borden, and others.

Citizens of Canada—STOOP and THINK.

Friends of the C.C.F. are doing their best to discourage the faith of the people in Government Bonds.

The canonical gospel, as authorized at the Regina convention, regards a Government bond as a sort of sin that can be atoned for at a smaller rate of interest, but the scriptural gospel, as preached and interpreted by Captain Elmore Phillips and some of the more eager apostles, goes a great deal further than that.

According to it, not only is it 4 per cent, a sin but any per cent at all is a sin and first thing the New Dispensation will do is to declare a moratorium on bond interest, from which, of course it is but two steps to make the moratorium permanent and then confiscate the bonds absolutely.

It is the Russian method of atonement that they have in mind.

The Government bond-holders must be made to suffer, possibly to suffer so much that no one will lend money to the Government any more and there will be nothing with which to pay Leader Woodworth his personal indemnity but the kind words to his followers.

Everybody with a bank account or a few Government bonds against the needs of his old age is in danger of losing his little all at the hands of these rampant regenerators.

Among the best and most cherished of our institutions marked for destruction are our efficient and firmly founded banks, railway systems, insurance companies, public utilities, mines and mineral resources.

Are you prepared to hand over these great Canadian institutions to a group of visionaries and fanatics?

Who would be appointed to run these great Canadian institutions?

How would they run them?

CRIMINALS OF CANADA, BEWARE of these vicious doctrines which will surely destroy everything the people of Canada hold most sacred.

YOUNG GIRL SHOT BY BROTHER

Accidentally shot in the abdomen by a 22 bullet from a rifle held by her brother, Ernest, 11, Elvina Toet, 6, died at her home near Wetaskiwin Saturday. Death came within two hours after the accident.

Hounded by his grandfather to empty the shells from his rifle, the boy expelled two shells from the magazine, closed it, and then pulled the trigger. There was a shot in the breach and the bullet hit the girl in the abdomen as she ran around the corner of the house.

The boy Monday was reported by police to be broken up as a result of the accident.

Police and the coroner, Dr. A. S. McCowan, arrived just before the girl died.

"Two been shot," she told them in German, and then died.

Ernie Toet, the father, is away hunting at the present time and the mother at the time of the tragedy, was in Wetaskiwin.

ELKHORN

Mrs. Harold Torbjorn and little daughter, Velma, of Meeting Creek, are visiting with relatives in our midst.

On Wednesday evening, November 15, the first meeting of the Elkhorn Literary Society was held in the school. There was a large attendance and a short programme consisting of readings, musical selections and a presentation was given by the programme committee. On the whole the meeting was successful and we hope to have many more such meetings in the future.

Miss Katharine Knadle, of Lacombe, spent the week-end with her parents, Mr. and Mrs. Joe Knadle.

Mr. and Mrs. J. Knadle gave a party on Friday evening, the occasion being Miss Katharine's birthday. Dancing held sway until the wee wee hours and a good time was enjoyed by all.

ALBERTA'S RHODES SCHOLAR

Alberta's Rhodes Scholar for 1933 is R. L. D. Fenerty, son of a prominent lawyer at Calgary. He will take up residence at Oxford in October, 1934.

California Mob Lynch Killers

SAN JOSE, Cal., Nov. 27.—Thomas H. Thurmond and John D. Holmes, confessed kidnapper-slayers of Brooke Hart, were lynched here Sunday night by a mob of 100 men.

They way into the county jail after a two-hour battle to seize the pair.

A whooping, cheering crowd estimated at 6000 persons looked on. Thurmond, first to confess was unconscious when dragged to St. James park, 100 yards from the jail, partially stripped and hanged to a tree.

Holmes, a powerful man, fought for his life in vain. Twice he wrenched his hands free and lifted the noose from his head, but the third time it was put there to stay, and still kicking, he was hanged to the air.

The lynching occurred only a few hours after the torn body of young Hart, son of a wealthy San Jose merchant, had been taken from San Francisco Bay, climaxed a spectacular battle between officers and mob.

The muttering throng began to gather about the jail about 3:00 p.m. Two shots, fired from the crowd as a signal started the first attack. Officers from within the jail let loose tear gas bombs. Blinded and weeping, the attackers fell back. By this time 3000 persons had gathered to watch. The mob could not be held off and on their second attack smashed their way into the jail and after knocking the sheriff unconscious and subduing the guards, dragged out the whimpering prisoners.

Holmes was knocked unconscious before he was hanged.

Jail attendants said they had never seen a man being lynch so terrified as these two confessed kidnapper-slayers.

FLOOD OF PORKERS ENGULFS BRITAIN

The Canadian pig with his cousins from Denmark and Sweden, keeps coming to the aid of Agriculture, Walter Elliott, awake at night. There is a plentitude of pigs today and the British breakfast table threatens to be glutted with rashers. Only three months ago there was a pig famine.

Now the British farmer has become a "pig-maniac" that has increased pig production by 70 per cent.

"I'm at my wits end to deal with droves of hundreds of thousands of pigs which come rushing and squealing from every part of England," says the minister.

The pig of Hamelin has nothing on him when it comes to pigs.

So the government faces the prospect of cutting down Canadian pig imports and making a fresh quota with Danish and other Danish imports.

Meanwhile, the country has learned with astonishment that 1,000,000 men on the land of Britain already produce enough food for 20,000,000. If another half million persons become farmers as part of the back to the land movement now advocated, Canada, Australia and New Zealand will find their markets for food exports hugely curtailed for they will have to supply only ten million people all told.

AT THE AVALON "WAX MUSEUM"

One of the strangest and most exciting thrillers, "The Mystery of the Wax Museum," shown at the Avalon this week.

The story, taken from the play by Charles E. Bodden, deals with a series of disappearances of both living persons and human bodies and the appearance of a terrifying monster.

The plot centers about a wax museum which has on display exceptionally life-like figures of personages of history and notorious criminals.

Important roles are enacted by Allen Vincent, Gavin Gordon, Edwin Maxwell, Holmes Herbert, Arthur Edmund Carew, Thomas E. Jackson and Monika Bannister.

The plot is a photographed entirely in Technicolor with unusual light effects used to heighten the fascination and mystery that dominates the production.

The direction has been handled by Michael Curtis, who is universally accepted as a past master in directing mystery thrillers. Curtis it will be remembered handled the megaphone for the recent Warner Bros. picture, "Doctor X," which was a tremendous sensation last year.

In addition to its excitement and suspense there is a romantic love angle with no end of humor supplied by smart, witty dialogue between Glenda Farrell, the hard-boiled wise cracking reporter who is on the trail of the mystery, and her managing editor, a part played by Frank McHugh.

Show starts week days at 8:30; Saturday 7:30 and 9:30.

Coming: Double feature, John Wayne in "The Big Stampede" and "Kay Francis in 'The Keyhole.' Dec. 7, 8 and 9.

"Hockey Show: 'Adorable' starring Janet Gaynor, Dec. 4, 5 and 6.

Will Rogers in "Too Busy To Work," Dec. 1, 2 and 3.

SUNSET W.I.

On Nov. 25, Mrs. Carl Sugeter entertained the Get Together Club and the Sunset W.I., to a delicious dinner. The afternoon passed pleasantly with music and recitation. The roll call caused lots of merriment. Each lady told what she would do with \$2000 if she had it.

On Nov. 15th the W.I. held a business meeting at the home of Mrs. W. White. The ladies completed their plans for a program and dance to be held during Christmas holidays, Dec. 23, in the Bentley Community Hall, in aid of the hospital.

MRS. J. TOLLER WINNER

With an estimate of 440, Mrs. J. Toller won the China Tea Set given away by S. M. Murray. The number of bars of soap in the pile was 439.

This week you can have a guess on a sealer of fish bones, and the prize is more Chinese ware. With every purchase however small, you get a guess.

CLOSED SEASON FOR FISH

Chased season is now in effect, for both Whitefish in Alberta lakes and for angling in the various rivers and streams of the province, and instructions of the regulations in this connection are being firmly dealt with, declared Hon. R. G. Reid, minister of lands and mines. Several convictions have already been recorded. "It is of first importance, that the seriousness of such infractions should be emphasized," said Mr. Reid. "There is a very definite reason for a closed season, and that is to protect the fish during the spawning season, and consequently to insure a continuance of the supplies of the fish in our lakes and streams. Where there no closed season, the supplies would very soon be depleted."

All felt mattresses; roll edge. Sizes 4 and 4-6. Price \$1.35 at Morrison and Johnston, Ltd.

CHEAP CHRISTMAS FARES

Spend Christmas at home—perhaps you have been wishing for a long time that you might go back East for Christmas, or visit the Old Country, once again. This is the year to gratify your wish. Invaluable low fares will be obtainable from now until January 5th to the Old Country; December 1st to January 5th to Eastern Canada. If you desire, should be to go south there are Home visitors' fares to the Central States available December 1st to January 5th, or to the ever popular Pacific Coast, November 15th to February 28th. The privileges in connection with these low fares are many, including stopovers, generous limits and optional routes, coupled with the finest comfortable Canadian Pacific service.

Mr. Jackson, ticket agent, Lacombe, will be glad to give detailed information.

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form, of the Bank's

ANNUAL STATEMENT

31st October, 1933

LIABILITIES TO THE PUBLIC	
Deposits	\$641,346,710.12
Payable on demand and after notice.	
Notes of the Bank in Circulation	33,819,807.50
Payable on demand.	
Bills Payable	258,578.04
Time drafts issued and outstanding.	
Letters of Credit Outstanding	6,151,280.54
Financial responsibilities undertaken on behalf of customers (see off-setting amount "x" in "Resources").	
Other Liabilities	10,642,442.25
Items which do not come under the foregoing headings, including \$1,000,000 advances from the Dominion Government under The Finance Act.	
Total Liabilities to the Public	692,218,818.45
LIABILITIES TO THE SHAREHOLDERS	
Capital, Surplus and Undivided Profits and Reserves for Dividends	76,317,090.20
This amount represents the shareholders' interest in the Bank, over which liabilities to the public take precedence.	
Total Liabilities	\$768,535,908.65
RESOURCES	
To meet the foregoing liabilities the Bank has	
Cash in its Vaults and in the Central Gold Reserves	\$ 78,683,217.88
Notes and Cheques on Other Banks	26,953,876.82
Payable in cash on presentation.	
Money on Deposit with Other Banks	25,334,859.87
Available on demand or at short notice.	
Government and Other Bonds and Debentures.	316,967,375.69
Not exceeding market value. The greater portion consists of gilt-edged securities which mature at early dates.	
Stocks	514,911.33
Railway and Industrial and other stocks.	
Call Loans outside of Canada	36,354,280.98
Secured by bonds, stocks and other negotiable securities of greater value than the loans and representing money quickly available with no disturbing effect on conditions in Canada.	
Call Loans in Canada	7,607,169.32
Payable on demand and secured by bonds and stocks of greater value than the loans.	
Bankers' Acceptances	111,293.01
Prime drafts accepted by other banks.	
TOTAL OF QUICKLY AVAILABLE RESOURCES (equal to 76.15% of all Liabilities to the Public)	492,526,984.90
Other Loans	251,885,262.61
To manufacturers, farmers, merchants and others, on conditions consistent with sound banking.	
Bank Premises	14,500,000.00
Three properties only are carried in the names of holding companies; the stock and bonds of these companies are entirely owned by the Bank and appear on the books at \$100 in each case. All other of the Bank's premises, the value of which largely exceeds \$14,500,000, appear under this heading.	
Real Estate and Mortgages on Real Estate	1,752,750.77
Acquired in the course of the Bank's business and in process of being realized upon.	
x Customers' Liability under Letters of Credit	6,151,280.54
Represents liabilities of customers on account of Letters of Credit issued by the Bank for their account.	
Other Assets not included in the foregoing	1,739,629.83
Making Total Assets of	768,535,908.65
to meet payments of Liabilities to the Public of	692,218,818.45
leaving an excess of Assets over Liabilities to the Public of	\$ 76,317,090.20

PROFIT and LOSS ACCOUNT

Profits for the year ending 31st October, 1933	\$ 4,003,153.59
Dividends paid or payable to Shareholders	\$3,060,000.00
Provision for Taxes, Dominion Government	508,538.81
Reserve for Bank Premises	100,000.00
	3,668,538.81
	336,394.78
Balance of Profit and Loss Account, 31st October, 1932	1,248,856.30

CHARLES B. GORDON, President

W. A. BOG, JACKSON DODDS, Joint General Managers

The strength of a bank is determined by its history, its policy, its management and the extent of its resources. For 116 years the Bank of Montreal has been in the forefront of Canadian finance.

McLeans Pay Death Penalty

Kenneth and William McLean, father and son, walked calmly to the gallows early Friday. The son died first with his lips sealed after he had said goodbye in the death cell to his father, while the father met his death after a farewell uttered to witnesses grouped about the scaffold.

The bodies were buried within an hour in remote corner of the jail premises, with car lights to aid the person and night workmen to assist.

The men were convicted of the murder of Walter E. Partridge, Manville wheat farmer, in September, 1932, and were hanged after appeals to the supreme courts of Alberta and Canada had failed and after executive clemency had been denied.

As the son left the death cell block first, he paused at the doorway: "Goodbye, father," he said simply.

"Goodbye, son," Kenneth answered. "We've travelled many a rough trail together and we'll travel this one. We'll keep going along the same way."

The two glanced momentarily into each others eyes, and the boy marched out in the corridors to reach the scaffold. He never spoke after leaving the death cell.

Kenneth, 22 minutes later, started his march to the scaffold. He route one of his light carpet slippers slipped off the heel. He paused for a moment, kicked it back on, and smiled.

"I guess I better keep that on so I won't catch cold." He experienced further trouble, however, and at the foot of the scaffold kicked off both slippers. He died in his stockinged feet.

As Hangman Arthur Ellis adjusted the black cap and nose, Kenneth declared in a loud, clear tone: "Goodbye, men—all of you."

With the men on the gallows when they died were Major Hector Habkirk, Edmonton, and Staff Sergeant T. Stewart, Calgary, both officers in the Salvation Army. Staff Sergeant Stewart was on the scaffold, when stationed here some years ago.

William went to the gallows at 3:47 a.m. and his body was cut down 12 minutes later. At 4:06 a.m. the trap was sprung from beneath the scaffold and he was cut down in 8 minutes. Neither was on the scaffold, before death for more than 10 seconds.

The bodies were placed in rough pine boxes and taken out to the graves which had been prepared Thursday.

The Salvation Army men performed the last rites, and at the same moment an inquest was in progress, and an official notification announcing the hangings were posted on the doors of the jail. There were two notifications for each death, one announcing that the jail physician, Dr. T. W. E. Henry, had examined the prisoner and found him to be dead, and the other announcing that the sentences of death had been carried out in the presence of witnesses.

BENTLEY CHAUTAUQUA

The Chautauqua closed at Bentley on Tuesday, after a fair four-day business. The guaranteeing committee, were down about \$200 or \$450 each. It is not probable that the Chautauqua will be continued at Bentley next year. For the sake of entertainment put on by Chautauqua, the guarantees appear unnecessarily high, and almost every community that has guaranteed its appearance has lost money.

MAN FATALLY HURT WITH 22 RIFLE

WESTLAKEWILL, Nov. 27.—Buddolph Sandahl, 23, farmer of Wynne district, nine miles east, was fatally injured Saturday night in his farm when a cheap, foreign-made 22 rifle exploded when he was about to clean it. The bullet entered below his left eye, rendering him unconscious. Death occurred en route to hospital.

CHILLED BEEF SHIPMENT

An interesting angle on new trends in live stock marketing is given by the announcement that the first shipment of chilled beef to leave Western Canada for the British market, went forward from Winnipeg last week.

The shipment was a substantial one, and its reception will be watched with interest.

100-YEAR OLD ALBERTA PIONEER

Andrew Sibbald, Alberta's first school teacher, attained the age of 100 years on November 19, 1933, at his home in Banff, was the recipient of many congratulations, including messages from Premier Bennett and Premier Brownlee and Lieutenant-Governor Walsh. Mr. Sibbald came to this territory 54 years ago.

Check over the Beds, Mattresses and Springs at Morrison and Johnston, Ltd.

Merry Xmas Fund Grows

A good start was made last week by ticket-sellers for the Benefit Dance to be held in the Adelphi Hotel on Friday, December 16th. \$14.60 was taken in last week, which puts the fund off to a good start. The dance is just a week from tomorrow, as everyone connected with the enterprise is working hard to sell tickets. \$40 is all a ticket costs, and by purchasing one you are doing your bit to help the needy families of the district. Last year over \$200 was realized from the dance, and turned over to the Central Relief Committee. This year it is the aim of the committee to even surpass last year's figure. The more money taken, the more families can be helped, so send in your subscription. A ticket will be promptly mailed to you. The dance will be a real one, too, with Bob Paulsen and his snappy dance band in attendance with the very best music. The dance is to be held in the Adelphi Hotel. Last year where everything possible will be done to assure dancers of a real good time. Do not delay, send in your money, or call at the Adelphi or The Western Globe office and get your ticket. A large Christmas cake will be drawn for on the night of the dance and each ticket entitles the holder to a draw.

The following money has been received to date.

Previously Received \$24.50

In last week's list C. Cawley was credited with \$1.50 it should have been 50c.

Calgary Brewery 1.00

Mr. and Mrs. H. T. Laughlin 1.00

\$37.50

CENTRAL RELIEF COMMITTEE FINANCIAL REPORT

The Central Relief Committee has closed its activities for the year ending November 24, 1933. Below is a summary of the donations received and how they were disbursed. The Committee wish to take this means of thanking those who so kindly gave of their time and money in coming to the aid of needy families during the past year. Particular mention is made of the outstanding donation of almost \$200.00 by the proprietor and staff of the Adelphi Hotel on December 23rd last when the entire proceeds of a benefit dance were turned over to the Committee. All assistance was to families living in the Town of Lacombe. The Committee also wishes to extend thanks to those who so kindly donated footwear and will be glad to receive further donations along this line at an early date. Help may be left at the Town Office for distribution.

L. P. Minkler, President.

Mrs. G. J. Doherty, Vice-Pres.

Mrs. Wilson Hinton, Secretary.

DATED Nov. 27, 1933.

G. T. JACKSON, Auditor

PICTURE OF VICTORIA'S SEA SERPENT

During the past month nearly a score of reputable citizens of Victoria, British Columbia, have reported sighting a strange monster swimming in the sea near that city. Such descriptions naturally vary, but all agree that this creature which has been named "Caddy" (Caddy for short), is from sixty to eighty feet in length and has a head resembling a camel or horse.

The above, which is a reproduction of an Indian carving or petroglyph of a rock near Victoria, is clearly a crude picture of this extraordinary prehistoric creature, showing that such were common in the waters round Victoria, when this carving was made some 2,000 years ago.

History Repeats Itself

This Time United States And Russia

Change Places

Apocryph of President Roosevelt's gesture of recognition toward the Soviet Socialist Republic, a gesture that has been withheld for some fifteen years, it is interesting to recall that it took Russia thirty-three years to recognize the infant Republic of the United States. The great Empress Catherine thought the American Republic an infamy—a people who dared challenge the divine right of emperors; who separated the Church from the State, and who had the insolence to declare that all men were born free and equal. To her Imperial Highness, this was an anarchy.

There followed the rule of the Emperor Paul, who played safe conservatism until Russia got rid of him by strangling him—the Russian alternative for execution. His successor, Alexander I, did not quite see why he should recognize a distant country across the sea, but as time went on and the other nations were doing it, and the thing became expedient from a trade standpoint, he consented to take the risk.

Now, after more than a century, it is the United States which is debating whether it should recognize Russia—and for the same reasons. It is a curious prank of history.—Ottawa Journal.

Helen E. Kimball's Recipes

New Cake Frostings By Director, Food Service Department Borden Company, Toronto

CRUNCHY CARAMEL FROSTING

One can sweetened condensed milk (caramelized); 1/2 teaspoon lemon extract; 2 cups rice flakes. Caramelized sweetened condensed milk (see note below for caramelizing recipe) until smooth and creamy. Add lemon extract and one cup rice flakes. Mix thoroughly. Spread on cake. Sprinkle top and sides generously with remaining rice flakes. Bake in a hot oven (450 degrees Fahrenheit) 10 minutes.

MARSHMALLOW CARAMEL FROSTING

One can sweetened condensed milk (caramelized); 12 marshmallows; 1/2 cup shredded coconut. Beat caramelized sweetened condensed milk (see note below for caramelizing recipe) until smooth and creamy. Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Bake five minutes or until coconut is golden brown in a hot oven (400 degrees Fahrenheit).

To Caramelized Sweetened Condensed Milk: Place one or more cans of sweetened condensed milk in a kettle of boiling water and keep at boiling point for three hours, being careful to keep can well covered with water. Chill thoroughly.

Airport For Singapore

Is Being Patterned After Best One In England

An airport patterned after the best in England and the continent is being constructed in Singapore, Straits Settlements. The new aerodrome will be about ten minutes by automobile from the heart of the city as compared with an hour for the existing landing field which is located on the other side of Singapore Island. The site of the landing field now under construction is a huge mangrove swamp about 70 acres of which have already been drained.

"Daughter," said her dad, "does that young man intend to marry you?" "Yes," she sighed, "if either he, you or I can get a job that will support us all."

An electric light bulb from Ada, Ohio, which has been in constant use for 30 years, is on display at the World's Fair at Chicago. The bulb was purchased by W. H. Freud at the St. Louis exposition in 1893.

Some new German refrigerators use dry ice as the cooling agent.

THOUGHTFUL NATIVE (To would-be rescuer): "Wait a bit, William. Perhaps the lady'd prefer to remain anonymous."—The Hummelist.

Not Right Solution

Drastring Punishment For Criminals

Suggested By Chicago Judge

There is a judge in Chicago who thinks habitual criminals should be executed. Further he would have motion pictures made of the executions and displayed to first offenders. The jurist believes that only in this way can the war against crime be won. Funny thing about those entrusted with the operation of the legal machinery in the country next door is that, almost without exception, they turn to extremes. It will occur to the average reader of newspapers, we think, that if there was stern and summary punishment of the known law-breakers in the United States the crime situation would quickly be cleaned up. The Chicago judge has reasoned it out the habitual criminal has forfeited his right to live in society, and should be done away with. There are records, however, of old offenders reforming and leading useful lives, and we have an idea that the Chicago jurist's idea will be going for support. General opinion seems to be that the crime problem needs a more up-to-date solution than this one, which is but a throwback to the days when criminals of all classes were hanged on the public gallows as object lessons. Those public executions did not prove to be the deterrent they were expected to be, and there was none to submit a brief for them, when an enlightened citizenry demanded abandonment of the ghastly practice.—Hamilton Spectator.

Recipes For This Week

(By Betty Barclay)

BEEF LOAF

1 1/2 pounds round of beef.
1 quart cold water.
1 tablespoon vinegar.
1 teaspoon sugar.
1 teaspoon sage and thyme, mixed.
1 tablespoon Worcestershire sauce.
Salt and pepper.
Slender the beef in the water with the salt until meat is tender. Cool. Remove bones and fat, and chop very fine. Boil the liquid until reduced to one cup. Add vinegar, sugar, sage, sauce, thyme, salt and pepper. Mix with the meat. Press into a buttered mold and leave to become thoroughly cold. Serve with tomatoes and lettuce with mayonnaise.

GRAHAM MUFFINS

1 cup sifted flour.
1 teaspoon salt.
3 tablespoons combination baking powder.
4 tablespoons sugar.
1 1/2 cups graham flour.
1 egg, well beaten.
1 1/2 cups milk.
1 tablespoon melted butter or other shortening.
Sift flour once, measure, add salt, baking powder, and sugar, and sift again. Add Graham flour. Combine egg and milk and add to flour gradually. Add shortening, beating well. Bake in greased muffin pans in moderate oven (375 degrees Fahrenheit) 20 to 30 minutes. Makes 18 muffins.

Found Another Job

Tiring of an idle life after his owners had given up raising sheep, Dick, a valuable shepherd dog, disappeared from his home near Suffolk, England, and was found guarding a strange flock which he had adopted.

Mr. A.—Is there any truth in the report that MacTavish has bought the petrol-lifting station?
Mr. B.—Well, I don't know for sure, but the "Free Air" signs have been taken down.

Some new German refrigerators use dry ice as the cooling agent.

Nickel Exports Higher
In the first six months of the current fiscal year Canadian exports of partially manufactured nickel increased 450 per cent. over those for the corresponding six months of 1932. For the first half of the last fiscal year nickel exports amounted in value to \$2,968,120, while for the same period in this year the exports were valued at \$13,473,280.

It takes 2,100 pounds of foodstuffs per year to feed the average person.

Germans smoked 5,640,000 cigars in the last fiscal year.

Water Buses On Thames

Passenger Traffic Is Planned For London's Water Highway

London's broadest highway, which has been practically neglected for 30 years or more so far as passenger traffic is concerned, is likely, before long, to come again into use. Private enterprise will probably soon provide a service of "water buses" on the Thames. Arrangements are afoot for the establishment of a service of vessels to call at the long-neglected piers which used to be served by the "penny steamers."

All the boats will be capable of a speed of 17 miles an hour. Express or non-stop boats will take about 33 minutes between Hammermith and London Bridge.

During the years 1905-1908 the London County Council ran a service of passenger boats on the Thames, which was eventually stopped because it did not pay.

It is believed that with the increased passenger loads of today, and faster, more economical and more expeditious boats, such a scheme will now be a success.

Richest City In World

Johannesburg, South Africa, Enjoys Continuous And Amazing Prosperity

The world's richest city today is not London or New York. It is Johannesburg.

This fact emerges from the comments that have followed a reference made by Samuel Storey, M.P., for Sunderland, on his return from South Africa, to the amazing prosperity of the city which is the centre of the Transvaal goldfields. At the peak of this year's boom on the Johannesburg Stock Exchange, gold mining shares rose to the fantastic total of three hundred million pounds. Not financiers and business men only, but miners, school teachers, office clerks, and laborers shared the golden opportunity of quickly rising prices, and having successfully speculated, they proceeded to enjoy their good fortune by spending it. They take no thought for the morrow.

In Johannesburg the morrow has always been left to take care of itself. As evidence that it does so, every one points to the progress of the city, which has been continuous.

Under plans approved recently by Hon. Thomas Murphy, Federal Minister of Interior, work is being started on the Jauper Highway, west of the town of Jauper, over the 17-mile stretch to the British Columbia border.

A 30-year-old apple tree is bearing medium and coarse fruit on the farm of Dr. Perry Fulkerson, near St. Joseph, Missouri. Never before has any tree in the orchard produced such fruit. The apples resemble the Jonathan variety.

If long-term credits are arranged, the shortening capacity of the Soviet Union not only for American machinery and tools but also for general consumers' goods are unlimited. Louis Kohn, former trade commissioner in Canada for Soviet Russia, declared in a recent speech at Montreal.

The Treaty Of Locarno

Many People Do Not Know, Or Have Forgotten, What It Is

Only the other day Mr. Baldwin was proclaiming the sanctity of the Treaty of Locarno to which Great Britain's signature is attached. It so happens that we have passed another anniversary of that treaty. It was signed on October 16, 1925.

It is a depressing comment on Mr. Baldwin's recent speech that we should receive here, as we have received, a fair proportion of letters from readers who ask: "What was the Treaty of Locarno?"

"They have forgotten! Or they never knew!"

Once for all, then, Article 4 of the Locarno Treaty does commit us. It commits us to support Germany if she is unjustly attacked by France or by Belgium. It commits us to support France or Belgium—again—if either is attacked by Germany. These things can never be too often repeated.

We will leave to our readers the related statistical problems of how we are to support Germany or France or Belgium with our present equipment in armaments (and above all) with an army meant solely for home defence.—London Daily Mirror.

Ireland Investigating Automobile Accidents

Despite Every Effort Number Has Not Decreased

That the government appoint a committee to investigate the large number of automobile accidents in Northern Ireland has been asked by the Ulster Automobile Club. The request was made following a meeting in Belfast at which it was shown that the automobile claimed at least 30 lives a day in Northern Ireland, and that, despite present efforts of the government, the number of road accidents has shown no decrease.

Nearly half of England's 41,500,000 people are smokers.

Have You Pimples or Boils?

Mr. T. A. Boney of Toronto, Ont., says: "I had a bad case of boils. I believe to the condition of my blood. I certainly was in misery as the boils were all over my face. I took Scott's Emulsion and in only two bottles Dr. Boney's Golden Medical Remedy cured me. I have had no return of these troubles. Sold by drug stores. Write Dr. Boney's Office, Buffalo, N. Y."

Canadian Fruit In Britain

Exhibits From Dominion Win Prizes At Imperial Fruit Show

The 12th annual Imperial Fruit Show and Canners' Exhibition held at the Columbia Hotel, Bristol, England, from October 27th to November 4th, the largest of its kind held annually in the British Empire, again saw Canadian exhibitors carry off a moderate share of the prizes. Canadian growers won twelve first, three second and three third awards in the British Empire and Canadian Commonwealth sections. In the latter F. A. Parker, of Berwick, Nova Scotia (which is in the Annapolis Valley, the chief fruit-growing district of Nova Scotia) won six first, two second and one third prize, also the cup given by the Agent-General of Nova Scotia. Earl W. Duncanson and R. J. Slayter, both of Gaspe, King's County, Nova Scotia, won awards. Nova Scotia's first prize was awarded a first and third respectively. James Lowe, of Oyanas, British Columbia, won five firsts and a third prize and was highly commended for his exhibit in the British Empire Section. In this section Mr. Slayter shared second and third prizes with an English competitor.

Exhibitors from British Columbia won all the prizes in the honey section that were awarded to Canada. L. Harris, of Vernon, took three firsts and three seconds; H. C. Derrick, Vancouver, one first, and Burpee MacLennan, Vernon, one first.

Canada is a large producer of apples and other fruits which are principally grown for the commercial market. In Nova Scotia, New Brunswick, Quebec, Ontario, and British Columbia. This year's production of apples is estimated at 4,588,000 barrels, a considerable percentage of which will be exported to the British Isles and other countries. The 1933 crop is about 821,000 barrels more than that of 1932.

Beef Cattle Smaller

Demand Is Also For Lighter Sheep And Hogs

Because the public has become more particular about its food during the past 10 or 15 years, beef cattle and sheep are smaller than they were a decade ago. And another reason is that families are smaller now than they used to be and more of them live in apartments.

This was one of the things revealed in an interview with J. C. Steckley, professor of animal husbandry at the Ontario Agricultural College. For eleven years he has been professor of animal husbandry at the O. A. C., and previous to that was agricultural representative in York county.

In the old days beef cattle were bulky animals. Those were the times when a cut or a roast would be served up in the average family for several days. But now, Prof. Steckley explained, the housewife and her family want meat that is more tender and they want more variety in their meat dishes. They don't want a roast to last two or three or more days. They want a different kind of cut every day, or as often as they have meat served.

In sheep, the same situation has come to pass," Professor Steckley said. "The lamb now in demand weighs 80 pounds. Years ago they were bigger and heavier. Less lamb and mutton is consumed in Ontario than in England, allowing for the difference in population, but more pork is eaten here than in the Old Country. Very few farmers specialize in sheep raising."

In the hog raising industry the weight of the animal has become stabilized at about 200 pounds. This has been the standard weight for years. But 15 years ago farmers fattened their hogs to weigh far beyond this figure.

Largely Temporary Idea

Canadian Students Too Sensitive To Adopt Real Principles

Canadian universities are not hot beds of socialism. Some few of the professors and some few of the student body may have the bug temporarily, but there is every hope that they will get over it. As long as young Canadian men and women continue to hold on to the common sense of their forefathers there is no hope of the Reds getting anywhere in our institutions of higher learning. When a few short-sighted people throw up their hands in horror and cry "Wolf," because some bad comes home and talks light-heartedly about the Brotherhood of Man or some such thing, they are making themselves ridiculous. He'll get over it in the natural course of events as long as too much fuss isn't made over it.—Guelph Mercury.

Letter Sorters Are Clever

Halifax Postal Employees Delivered Letter Added In Figures

Letter sorters in the post-office don't invite people to address letters in code, but they made it known they could understand some of them.

One envelope arrived at Halifax, Nova Scotia, with a series of numbers but not a letter written on it. This took a little thought for the boys who took around letters like a "hustler" does handbills. But the letter finally was delivered to a soldier in Wellington barracks.

Each figure represented the corresponding numerical position in the alphabet they discovered.

Daughter," said her dad, "does that young man intend to marry you?" "Yes," she sighed, "if either he, you or I can get a job that will support us all."

An electric light bulb from Ada, Ohio, which has been in constant use for 30 years, is on display at the World's Fair at Chicago. The bulb was purchased by W. H. Freud at the St. Louis exposition in 1893.

Some new German refrigerators use dry ice as the cooling agent.

Nickel Exports Higher
In the first six months of the current fiscal year Canadian exports of partially manufactured nickel increased 450 per cent. over those for the corresponding six months of 1932. For the first half of the last fiscal year nickel exports amounted in value to \$2,968,120, while for the same period in this year the exports were valued at \$13,473,280.

It takes 2,100 pounds of foodstuffs per year to feed the average person.

Germans smoked 5,640,000 cigars in the last fiscal year.

THOUGHTFUL NATIVE (To would-be rescuer): "Wait a bit, William. Perhaps the lady'd prefer to remain anonymous."—The Hummelist.

Church For Airmen

Simple Building Is Being Erected In French Village

A church is being built for French airmen.

Officially the parish church of Nouveau Bourget, the village on the border of Le Bourget, the Shrine will contain a chapel dedicated to Our Lady of the Skies.

New Bourget, which numbers 7,000 inhabitants, has been growing ever since the famous airport was turned over exclusively to civil aviation. It is expected the village will number 15,000 inhabitants by the end of 1933.

St. Charles du Nouveau Bourget will be the name of the church in memory of Charles Nungesser, who, with Coll, first attempted to fly from the European continent to North America and disappeared. The shrine is officially dedicated to the memory of Mgr. Charles Ghibler, bishop of Versailles, great friend of airmen, who died in 1931.

The church, built on the simplest lines, will cost about one million francs, not counting the three million francs to be installed in the belfry, and of which the largest will toll for the Shrine with head lifted and arms outstretched, as if she were about to "take off."

The airmen's chapel will be presided over by a white limestone statue of Our Lady of the Skies—a work of modernist simplicity which represents the Virgin with head lifted and arms outstretched, as if she were about to "take off."

Questions Relating To Costs, Prices, And Wages Are Confusing

If wages go up, costs go up. If costs go up, wages must go up some more. Thus the economic spiral rises with three items like three dogs chasing each other around the tracks, all the while climbing a pole in the middle of the spiral just out of reach of all three, which one ought to be ahead?

If wages are ahead of prices, prices can not pay the wages. If prices are ahead, wages can not pay the prices. Always between them is the galloping item of cost.

When we had what we called prosperity, which item was ahead? Did the machinery stop because the position began to change? Now that they are winding up the clock works to make the machine go up again, which item must be kept ahead, and how wide must the gap between them be? Running all three abreast might be better.

But is the track wide enough? And which should have the inside track, closest to the rabbit going up the pole? And what difference does motion make if there is no change in the relative position of the three?

Questions like these give anyone a headache if he has anything in his head to ache with.—San Francisco Chronicle.

Here and There

One of the largest cargoes of lumber shipped from Saint John on the Canadian Atlantic sea coast was forwarded to Great Britain recently. It consisted of 3,043,696 feet, mostly of deals.

Output of nickel in Canada in 1933 totalled 30,327,368 pounds valued at \$7,178,862. Production during the first six months of 1934 amounted to 22,802,434 pounds as compared with 21,167,746 pounds for the corresponding period of 1933.

Every home at some future date will have "air conditioning" and the word "heating" will pass out of use among home owners, J. J. Donovan, General Electric Company expert, told a largely attended meeting of the Electrical Club at the Royal York hotel, Toronto, recently.

Steep grades of the Rocky Mountain area presented no difficulty to the Royal Scot, crack British flyer, en route to Winnipeg and the east from Vancouver recently. The all-British train is attracting great popular enthusiasm throughout Canada on its return journey to Montreal.

Montreal's "million dollar hole" on Dorchester street, where a railway terminal was to have been built, will become the world's most costly sunken garden, if Canada sees eye to eye with a couple of Montreal aldermen who advocate beautifying the gash with flowers and shrubs.

Canadian Pacific employees under 21 and minor sons of employees are again offered the opportunity of two University of Montreal scholarships by competitive examination, according to an announcement by Grant Hall, senior vice-president of the company. Applicants have until May 1, 1934, to make application.

Twenty-one months of training in a recognized shop, junior matriculation or its equivalent and a course in an academy to be established in Toronto is the ordeal for novices for Ontario registration as barbers and hairdressers. It was stated at a meeting of insomniac arbiters at the Royal York hotel, Toronto, recently.

Five ports hitherto not on the schedule of world cruise lines have been added to the 1934 itinerary of the Canadian Pacific liner Empress of Canada when she leaves New York January 4 next. They are Semarang, Java; Buea, and Padang Bay, island of Bali; Port Moresby, New Guinea; and Zanzibar, in the Sulu Archipelago.

In making a choice between transportation by rail and by road, shippers should consider what the railroads are doing and have done for their customers. G. G. O'Malley, development commissioner, Canadian Pacific Railway, told the history Club of Londonville, Vt., recently. He cited many cases where the railways had first inventoried, then developed the natural resources of the continent.

LACOMBE AND DISTRICT NEWS

We are sorry to hear that Wesley Henderson was seriously injured when kicked by a horse. Hoping to see him around soon.

Mrs. Randlett and son, Gordon, visited at the home of Fred Johnson.

Mrs. Harry Gale and daughter, Miss Mary Gale, spent Monday at the home of Mrs. B. McLean.

Mr. Kenneth Hand was paid a visit on Sunday by Mr. Cliff Bellie. The young ladies of the district are glad to see that George has his car in good repair once more. Go easy on Shaw's hill, George.

We are glad to hear that Mrs. Sam Henderson is home once more and is on fair road to recovery.

Mr. & Mrs. Chiswell and Margaret have moved to Edmonton to bring back Mrs. Chiswell and Dorothy, as the latter has been very ill. During his absence, Mr. Jack Smith, of Lacombe is taking charge of the farm.

Mr. Harold Talbot of Chiswell has been visiting in the Chiswell district for the past week. Miss Elma Schilling of Milton, who is attending the Lacombe High School, spent the week end with her parents.

Mr. Harold Talbot has purchased a new load of Percheron horses. They are fine stock. Things are commencing to sound like Christmas. Mr. Sam Davidson of Central and Miss Gaez, of Milton, are training their pupils for the Christmas season.

Mr. Jack Jeffreys is still with the Hill Brothers. Hoping he will remain for the winter, as he is very popular at concerts and parties on account of his fine voice. We all enjoy his singing very much.

Mr. Douglas Edgar has become a wiser man. He now returns home by sunset. (No more colds.) Mr. George Eckard, of Geneva, is working for Mr. G. Lemon, of Chiswell.

Lloyd Melrose is again visiting in the Milton district. There must be strong attraction (eh, what!).

Don't forget the Odd Fellow's Dance next Tuesday evening.

Mr. Robert Hainworth left on Saturday for a visit to his old home in Ilkley, Yorks, England.

Are you here laying or boarding? We have a laying mash, balanced with all grades of requirements, \$1.75 cwt. Lacombe Milling Co.

The Christmas month will be particularly appealing to the children. Enroll now for December. The Browne Kindergarten. N28-2p

Prices on all commodities are sure to raise, and we have just, unpacked a large shipment of Dinnerware. Odd pieces in China, all bought at the low price and we sell it accordingly at Lacombe Furniture Store.

General Electric Power Washburn Machine with all latest equipment. Price \$139.00 at Morrison and Johnston, Ltd.

Special Clean Out Prices on Heaters at Morrison and Johnston, Ltd.

Come to the annual Christmas Tea and Sale of Work and Home Baking at St. Cecilia's W.A.C. in the Oddfellows Hall on Saturday afternoon from 3 to 6 p.m. Prize to be awarded to the giver of the prettiest decorated cake. The sale will be opened by the Dean of Calgary at 3 p.m.

Fire broke out in the residence of Mr. and Mrs. C. Knight Friday forenoon, and the house and contents practically destroyed. The residence, belonging to Mr. Fred Dickau, and situated just west of Denard Ave., was discovered to be on fire by one of the children, and notwithstanding the prompt response of the fire brigade, much damage was done, and the family left practically destitute.

Pondica Herald

New Suit Cases, Packtrite Cases, Steamer Wardrobe and Box Trunks in endless variety at Lacombe Furniture Store.

The Lacombe Milling Co's. program broadcast over C.F.R.A. last Friday evening, was greatly enjoyed by the listeners in here, who hope to be favored on future occasions.

Prices on all commodities are still going strong and the prices are very much lower than last year. \$29.96 up, at Lacombe Furniture Store.

Experienced girl wants work. Apply Globlo Office.

Sweet's Pharmacy has the song suite of the Fox picture "Adorable" in both sheet music and records. The songs are "Adorable," "My First Love to Last," and "My Heart's Desire." This picture will show here, December 4, 5, and under auspices Hockey Club.

A public meeting will be held in the Church Hall at 8 p.m. on Tuesday, Dec. 5, to be addressed by Hon. Irene Parby and Russell Love, M.L.A., on Provincial matters, and Elmer Roper, of the Alberta Labor News, on the C.C.F. Everybody welcome and questions desired.

The Annual Meeting of the Lacombe Women's Institute will be held at the home of Mrs. Todd, on Friday, Dec. 1, 1934. Roll Call: Christmas suggestions.

See our line of new furniture for fall. Our stock is complete and the prices the lowest over Lacombe Furniture Store.

DANCE AT LINCOLN

There will be a dance at Lincoln Hall, on Friday, December 8. Music by Clark's Orchestra.

NATIVE SONS HOCKEY

All those interested in the organization of the Native Sons Hockey Club for this season are urged to attend the meeting at Geo. Sheel's Tailor Shop next Monday, Dec. 4 at 8 o'clock. The election of officers for the season will take place, and all preparations will be made for the winter. It is hoped that a large number will attend as practicing will start soon.

SPRING VALLEY

Between 80 and 90 persons gathered at the home of Mr. and Mrs. Gordon Sharp on Wednesday, Nov. 22nd, to attend the Chicken Supper and Social, which was held under the auspices of the Spring Valley Women's Missionary Society. A musical program was a delightful feature of the social, and the W.M.S. received \$31.00 towards their allocation fund.

STRONG STATEMENT ISSUED TO SHAREHOLDERS BY THE BANK OF MONTREAL

The Bank of Montreal to again forwarding to shareholders its usual strong statement. Total assets at \$76,636,742 are practically unchanged from the previous year, but liquid assets, represented mainly by investments in the highest grade securities, are as high as \$42,026,934, equivalent to 54.7 per cent. of total liabilities to the public. At this level they show an increase of over \$9,000,000 as compared with a year ago. At the same time, the increased requirements of the customers of the Bank for accommodation has resulted in a decrease of corresponding amount. In current loans and this situation probably accounts for the unusually large increase in holdings of gilt-edged securities.

Following the practice of giving the fullest information, the Banks statement appears in easily understandable form, in order that the layman may be able to readily understand the underlying strength of the Bank's position and its ability to be of the greatest possible help in almost any development that may arise.

The complete statement, which appears elsewhere in this issue, is replete with interesting features that should be carefully studied by every Canadian desirous of being fully acquainted with the reassuring condition of the Bank's assets.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver! No Calomel needed

When you feel tired, depressed, sour in the world, that's your liver which isn't pouring its daily two pounds of bile into your bowels. Bile is the natural cleanser of the system. It is the only natural purgative you can take without hurting your bowels. It is the only natural purgative you can take without hurting your bowels. It is the only natural purgative you can take without hurting your bowels.

SPRUCEVIEW NEWS

Remember the dance to be held in the hall on Friday night, Dec. 1st. Mr. Weigert's Orchestra will supply the music, so come and have a good time.

Mrs. Gottschalk is expected home this week from Utah, U.S.A.

The Sunday School Children and parents spent a very enjoyable afternoon at the hall on Saturday. Games were first played followed by a supper.

Everyone present appreciated the talk given by Mr. J. B. McCormick on the C.C.F. at the U.F.A. meeting Tuesday night. We hope that more of these criticisms and opinions will be given at the meeting during the winter.

A meeting of the Burns Club was held at the home of Mr. and Mrs. Houlter last Friday night. They decided to put on a concert and dance on the usual date but the supper was voted down.

MORTGAGE SALE

FARM PROPERTY

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act" under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Post Office in the Town of Lacombe in the Province of Alberta, on

SATURDAY, DECEMBER 2nd, 1935 at the hour of 3:00 o'clock in the afternoon, the following property, name—

The South East Quarter of Section 26 in Township 44, Range 28, West of the 4th Meridian, containing by admeasurement 160 acres more or less, and subject to the reservations and provisions contained in the Patent from the Crown, excepting thereout all mines, minerals, gas, petroleum and valuable stone.

Terms of sale to be Ten (10) per cent cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property is situated about fourteen miles from the Town of Lacombe at which point is the nearest Post Office. The nearest grain elevator is at Gull Lake 6 1/2 miles distant from the property, the nearest school is one-half mile distant from the property.

The land contains 160 acres of which 110 acres are under cultivation. There are approximately 50 acres of brush and 30 acres of land seeded to Brome. All the property could be cultivated if cleared.

The soil is black loam, part chocolate, six inches to two feet deep, with clay subsoil.

There is a drilled well on the property.

The property is all fenced, and 1/4 of a mile cross fenced, with 2 and 3 strands of barbed wire, and poplar and tamarac posts.

Buildings on the property are:

2 Frame Dwelling with shingle roof, 24 x 24.
1 Frame Barn with shingle roof, 20 x 30.
1 Frame Hen House, board roof, 12 x 12.

1 Frame Hog House, board roof, 12 x 26.
1 Frame and Slab Granary, board roof, 12 x 16.
1 Slab Granary with Slab Roof, 12 x 14.

1 Frame Well House, no roof.
For further particulars and conditions of sale, apply to

Messrs. Newell, Lindsay, Emery & Ford

Barristers, Canada Permanent Building, Edmonton, Alberta.

Dated at Edmonton in the Province of Alberta this 17th day of October, A.D. 1932.

Approved, "A. T. Kinnaird"
Deputy Registrar.

British Aviator Has Amazing Escape When Forced To Jump In Spinning Research Trials

Flight Lieut. C. S. Standland, test pilot and racing motor car driver, had an amazing escape from death when he was spinning a special research spinning trials with a secret type of aeroplane near Colnbrook, Middlesex, recently. Spinning trials form part of the routine work in the testing of new British aeroplanes, and these trials are first done by the manufacturers and are repeated by the official test pilots of the air ministry's experimental stations.

Often considerable risks must be taken by these pilots when some novel feature is being tried out, as in this instance, special research work is being done by the test pilot special facilities for dealing with emergencies. It is doubtful if, in the whole history of flying, any test pilot has had such an anxious moment as Flight Lieut. Standland.

He was performing special research spinning trials at about 7,000 feet when a flat spin developed with high rate of rotation. For some time he endeavored to extricate the machine but without success. Finally he decided the time had come when he must jump with his parachute. The aeroplane was spinning to the right and he decided to jump over the left side of the fuselage in order to fall clear of the machine.

Owing to the direction and speed of rotation of the aeroplane, however, Flight Lieut. Standland was immediately hurled back into the rear cockpit of the machine. Fortunately he had not begun to pull the rip cord of his parachute, so that the canopy was still in the pack. The rear cockpit of this particular machine is deep and he found difficulty in getting up to his feet as a result of the high centrifugal loads. But eventually he struggled to his feet and jumped out of the machine for the second time.

Through all these experiences he remained perfectly cool and was able to guess the cause of his being thrown back into the machine. He reasoned he must jump this time over the other side and this he succeeded in doing. The machine still spinning flat and rapidly. He fell clear but waited to ensure there was no risk of his parachute fouling the aeroplane. The aeroplane passed within a few feet of him as he fell, and he pulled the rip cord. Immediately afterwards he saw the machine only a few feet below him. While he had been pulling at the cord the aeroplane must have passed behind him, falling at a higher speed than he, but he did not know it. He landed safely near Colnbrook, and his aeroplane crashed in a disused gravel pit about two miles away.

Flight Lieut. Standland is a pilot with a remarkable record. He has had many events, been on display in track, and recently during the Uster T.T. motor car race he set up new class lap records in a six-cylinder car. In 1928 he was selected to be a member of the British Schneider trophy team. His skill at acrobatics is universally acknowledged.

By Ruth Rogers.

494

A SMART DRESS FOR MATRONS DESIGNED TO GIVE GRACEFUL TALL ALIENISTE

For those who like a simple smart dress to start the season, here's your dress. It will meet all day occasions admirably as the original in black wool crepe. Tucked into the becoming V-neckline is white lace that ends in soft jabot tie. It has length-giving pleated skirt.

Style No. 494 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

The small view shows short sleeves with corded puffing trim. This interesting detail is easily accomplished. The pattern envelope explains just how to do it.

Size 36 requires 3 1/2 yards 39-inch material with 1/4 yard 51-inch lace. Price of pattern 20 cents in stamps or coin (coin is preferred).—Wrap coin carefully.

Home Of Poet Restored

Philadelphia House of Edgar Allan Poe Now Public Shrine

Restored in every detail to its appearance of a century ago, the Philadelphia house of Edgar Allan Poe has been opened as a public shrine.

It was here that he wrote the poem, "The Raven," and many stories, including "The Gold Bug." Many original manuscripts, first editions and other valuable pieces from collections of Poe's works now are on display in the restored, three-story cottage.

Included among the original articles are a stove, a desk and bedroom furniture. A bust of Pallas has been placed in the study in which Poe worked.

Human Race Improving

Will Be Even Finer And Healthier Inside Of Century

Dr. George W. Cline, of Cleveland, a noted medical man, who sees visions and dreams dreams in the laboratory where he investigates the riddles of life and death, told the recent Congress of the American College of Surgeons that the human race would be a much finer and healthier one inside of a century. This is more encouraging than the pronouncements made by some distinguished scientists that the present face of human life would result in an ever-increasing number of mentally diseased persons.

Misses Lost Pounds

"Aunt Mamie" Williams, Negro, who once tipped the scales at 798 pounds, has complained to the Sheriff's office at Jacksonville, Florida, that troublesome neighbors have caused her to lose 200 pounds. "They have made her feel 'poorly,'" she said, and she wants peace and quiet restored that the lost pounds may be regained. She is forty-eight and works the garden in which much of her food is raised.

Much More Important

Hitler boasts that he does not drink or smoke. But, says the Brickville Recorder and Times, he hasn't said a word about the commandment, "Thou shalt not kill."

Stamp Collectors Interested

New Air Service To Fly North To Be Inaugurated Soon

Philatelists or stamp collectors are awaiting with interest the inauguration of two extensions to be made by the Canadian Post Office Department of its air mail service along the Mackenzie River in the Northwest Territories. One extension will be to Cammell River, about 85 miles from Cammell Bay, the principal settlement on Great Bear Lake. The other will be to Coppermine on the shore of the Arctic Ocean, 200 miles north of Cammell Bay, or about latitude 68. It is expected that the new service to Cammell River will be inaugurated this year and to Coppermine about January 15th next.

Stamp collectors are always interested in what are termed first flight cancellations, a special cover bearing an impression to commemorate the inauguration of the first mail despatched over the new route. These cancellations are affixed the air mail stamps. The practice among stamp collectors is to despatch a self-addressed envelope by the air mail. The Post Office Department carries this to Cammell River or Coppermine, as the case may be, and from there returns the envelope, with stamp properly cancelled, to the addressee.

It is estimated that when the two mail service extensions begin several thousand stamp collectors will buy the commemorative cancellations. This will mean plenty of work for the postmasters at the remote offices at Cammell River and Coppermine for they will have to cancel the stamps on the stamped addressed envelopes which the collectors will enclose in the first flight cancellations.

All the principal points in the Northwest Territories now have a regular air mail service summer and winter. Prior to November, 1929, when the air mail service was introduced to remote points in the Far North, such points had little contact with the outside world during the long winter months. Residents in the Northwest Territories are now fairly well contacted with the rest of the world for in addition to receiving mail regularly many of them have radio receiving sets, and reception is excellent. The program from the powerful stations in Canada and the United States is received, but others from the British Isles and European countries are often heard.

Several Causes For "Bumps"

Device Perfected To Check Up On Jolts In Air

Aviators meet with so much "bumpiness" in the air that a device has been perfected to record on a numerical scale the extent to which this condition exists at any hour and place in the following degrees: 0, no bumps; 1, slight bumps; 2, occasional bumps; 3, bumps; 4, very bumps; 5, exceptionally bumps. When in the course of flight an airplane receives a jolt the experience is called a "bump." This may be caused by one of the following conditions: Eddies and other irregularities produced in the horizontal flow of air by hills and mountains. Storms, regardless of the state and configuration of the ground. Vertical currents set up as a result of surface heating of the earth's surface, such as the contrast between a green field and a tract of bare ground strongly heated by sunshine. This last condition is called a "heat bump" and is often traced to very small features of the ground such as highways, railroads, fields, forests, swamps, stone lines, ditches and the roofs of barns.

Four Centuries Ago

Graf Zeppelin Reminds Spain Of Columbus' Return From New Land

Seville, Spain, thrills to see the Graf Zeppelin loom out of the twilight. The huge airship halts near the Tower of Gold for a short break in the night from Akron, Ohio, to Friedrichshafen, Germany. Seville, which the world has known for centuries in memory, to days when the ships of Columbus, Ponce de Leon, Cortes and other conquerors came up the Guadalquivir from the New World to unload at the Tower of Gold the treasure which was to make Spain commercial and art mistress of Europe. Now airships from the New World. Experienced Seville trembles before the wonders of days so soon to come.—Christian Science Monitor.

Factories In Germany

Chemical Works Could Be Quickly Transformed For Making Gas

Germany has this great advantage over the other military powers—it has no out-of-date war material. This is especially the case with air armaments.

There is not a single chemical factory in Germany that could not be transformed into a gas factory within six weeks. Since 1930 in all the explosive factories of Germany there has been an enormous increase in the capacity of production.

Within a maximum delay of three months enough gas and explosives for war could be easily produced.

Black diamonds, or carbons, are found mainly in Brazil in river or stream washings. They are rare and highest priced of all industrial diamonds.

Unnecessary Accidents

Mechanical Condition Of Many Cars Menace To Safety

Justice Kelly speaking in the supreme court at Whitby, Ontario, uttered a great truth when he stated that many automobile accidents were caused by people driving cars which had long since qualified for the junkpile. His observations were made from his experience of court cases arising out of such accidents, and they will be supported by many who have been victims of accidents because of inferior, and sometimes uncontrollable cars, being driven on the highways.

This condition is, perhaps, more apparent at the present time than it has been in past years. Cars are being driven on the highways today which, in more prosperous years, would have long before been consigned to the scrap heap, unfit for further service. But that is no reason why human lives should be endangered. No car should be allowed to travel on the highway unless its mechanical condition is such as to keep it well within control, to make a safe vehicle to drive.

Both pedestrians and motorists whose cars are in safe condition have a right to such protection, and if there is no law which can keep unsafe cars off the roads then it is time one was enacted.—Oshawa Times.

Not A Pleasant Refuge

Prison Should Be Corrective Institution For Law Breakers

A penitentiary is a disciplinary institution, with fixed regulations imposed as the result of long experience and expert knowledge. Sometimes those regulations may prove irksome but that is no justification for clamorous demands for their abolition. The attitude should be one of sympathy with the administrators as well as the convicts. The former have a difficult duty to perform and the latter should realize that they are suffering the consequences of their misdoings and that in the process they cannot expect society to deal with them as with honorable citizens who have not transgressed the laws. A prison is not, and should not be, a pleasant refuge for the weary, but a corrective institution for the vicious.—Hamilton Spectator.

A Great Responsibility

A motorist in Hull, Que., was held on a charge of manslaughter arising out of an automobile accident in which a car he was driving collided with a truck killing a friend who was riding with him as a passenger. This provides another argument against the practice of giving a lift to pedestrians on the highway. Very few motorists realize the responsibilities they accept when they take their place behind the wheel of a car.

The air in New York City is cleanest in April, most laden with dust and dirt in December.

More than half the money spent for amusement in Paris last year was for movie admissions.

Safety In The Home

Commonsense Rules Given By Health Officer Of New York

New York's health commissioner has prepared a "home safety code for adults" containing a list of injunctions. Some of these are:

- Have every room and all stairs well lighted.
- Keep floors clear of grease, toys, etc., and the stairs free of all encumbrances.
- Use a rubber bath mat in the bathroom.
- Use a step-ladder when working above the floor.
- Use non-inflammable cleaning fluids.
- Keep wet hands off electrical appliances.
- Read the label before taking any medicine.
- Use commonsense, do not rush, be careful.
- These are all rules of elementary commonsense. But it is just by the simple neglect of ordinary precautions that accidents occur in homes.

Have No "Unwritten Law"

British Countries Do Not Recognize It States Judge

Canada is told officially it has no "unwritten law." Judge Joseph Weir, a man in a London (Ont.) court for using a knife upon an offender against his wife. "In the United States," says the magistrate, "judges and juries recognize an unwritten law and hold that fathers and husbands may on occasion take the law into their own hands, but never in British countries." The weakness of the unwritten law is shown in its very name; if it were on the statute books it would be discredited in a day.—Christian Science Monitor.

Discussion For Next Session

Federal House To Debate On Question Of Titles For Canadians

Whether Canadians should be allowed to accept titles from the king, will be discussed by parliament when it opens next January. Humphrey Mitchell, Labor member for Hamilton east, is expected to start a full-fledged debate by introducing a resolution to continue the title-ban with the exception of judges, military and naval officers.

Premier R. B. Bennett, shortly before the close of the last session, announced the government did not consider itself bound by the Nicksie anti-titles motion passed in 1919.

Honor Goes To Prussia

The world's oldest flea has been discovered at Paderborn, East Prussia. The venerable insect is 5,000 years old, according to scientific examination, and is housed in a piece of amber, found recently on the Baltic shore.

Miss E. M. Sutton, a Socialist, is to be the first woman mayor of Reading, England.

Poplar is the most abundant hardwood in Canada.

Lancashire Woman Who Claims Relationship With Edison Has Some Remarkable Inventions

Earth's Last Blind Spot

Admiral Byrd Seeking To Throw Light On Antarctica

Admiral Byrd is off. It is a long, long way to Antarctica, but Byrd is little by little beginning what is, to him, something of a homing flight. The man who established "Little America" and lived there as long as Byrd did cannot but feel that he is setting forth for a strange land. Yet, it is a fact that the land toward which the admiral is voyaging is the blindest of all the blind spots of the earth's surface. It is, in truth, the only really blind spot left.

Surely there has never been another explorer who has made his work so interesting to so many. He is the first man to render Antarctic exploration a matter of common knowledge and a topic of household conversation. He is the first explorer whose expedition, even before its starting, has been celebrated by a special postage stamp of the United States.

There is enough romance in the journey southward to the earth's most remote limit, but there is more romance. Antarctica is a mass of land comparable in area to the habitable continents. It is, therefore, vastly more important as a field for scientific exploration than the north polar regions, which are all water. Human beings cannot live on a frozen sea, or derive much benefit from it, but with the world's population ceaselessly increasing, man cannot conceive that any land is beyond his attainment. Not, probably, as a place of permanent habitation, but as a source of some of the mineral necessities of civilized life the great continent beyond the southern oceans may some day be as well known and adequately mapped as the State of Rhode Island.—Cleveland Plain Dealer.

The Empire State Building

Thousands Have Viewed New York From Observation Tower

The first week the Empire State Building observation tower opened 31,000 people poured upward to see the view. Six months later attendance during the Christmas week had fallen off to 2,800. And in a recent week only 5,685 leaned over the rampart of the highest building in the world and said, "Ooohh!"

A few weeks ago a register was started up in the observatory and the results have been gratifying. Previously they thought the crowds had been too great. From a registration totaling about one-third of the total attendance it was learned that visitors came in one week from forty-six States and forty-five countries. Only one in ten came from New York City, said but true.

On the other hand two people John Stephens of Mudros and Paulin Mason of London, came from places that Empire State Building executives had never heard of. They looked on their maps and saw nothing. They called up the National Geographic Society and learned that Mudros is on the island of Lemnos in the Aegean and that Libos is now called Lefkada and has 60,000 inhabitants. Quite educational.—New York Evening Post.

Nobel Prize Winners

Russian Writer Is Awarded Prize For Literature

Three Nobel prize awards have been made, including the annual prize for literature, given to the Russian author, Ivan Alexeyevich Bunin.

The 1933 award in physics was divided between Paul A. M. Dirac, Canadian professor of mathematics at Cambridge University, England, and Professor Erwin Schroedinger, of Austria, for their work in connection with the atomic theory.

The 1932 physics prize was awarded to Professor Werner Heisenberg, of Leipzig, Germany, for his work on a theory of the mechanics of quantities, application of which led to the discovery of allotrophic forms of hydrogen.

Bunin, now living in France, was born October 10, 1870, the son of a Russian landowner. Among his best works are poems of his country inspired by boyhood experiences.

Cost Of Armaments

Two Nations Spending Millions With Huge Budget Deficit

A Tokyo cable to the New York Times tells that Japan faces a budget deficit in the coming year of \$270,000,000. Yet Japan will spend on her army and navy next year \$351,000,000. Civilization truly is a baffling thing.—Ottawa Citizen.

And the country where the New York Times is published has budgeted for a deficit of \$307,000,000 in 1934 and navy and army expenditures (exclusive of non-military items) of \$386,000,000.—Toronto Star.

Mrs. Peck: "She's very pretty, but she never says a word. I can't imagine why all the men speak so highly of her."

Mr. Peck: "I can."

Boxing matches are popular in Paris.

Following In The Footsteps Of Edison

the world-famous inventor, whom she claims as a remote relative. A Japanese woman has to her credit a number of remarkable inventions.

Under her maiden name of Nell Bradshaw she has patented some extraordinary devices.

In the drawing-room of her home at Heaton Chapel, near Manchester, Miss Bradshaw has her newest inventions set out on the carpet and even on the piano stool.

Her four latest and most important inventions are a lamp for penetrating fog at sea or on land; an improved robot signalling apparatus, an anti-drowning life-jacket; and a thief alarm for unattended motor cars.

With the curtains of the drawing-room closed, Miss Bradshaw demonstrated the capabilities of her lamp for penetrating fog or darkness.

The lamp was built externally of copper, and with a series of lenses inside the "bull's eye."

Miss Bradshaw switched on the light and directed it to the farthest corner of the room.

So powerful was the effect that a pin held on the wall could be seen quite plainly at a distance of 15 feet.

The light itself was amber, and the current was taken from one of the ordinary wall sockets.

"By using a more powerful lamp at sea," declared Miss Bradshaw, "it would be possible to dispel fog for a distance of at least five ship-lengths away."

"That distance could be increased by building the entire lamp on a larger scale still."

"It has been tested on the road by the Stockport police and two of the principal bus companies operating in the North, and nearly the Ministry of Transport has taken an interest in it."

Miss Bradshaw then showed her life-jacket, which is made of rubber and is fitted with four pockets.

It is intended for use by life-guarders at seaside places, and by shipwrecked seamen and fishermen, who are forced to come down on the water.

By inflating a tube attached to the jacket it is always ready for an emergency.

It was like a short water-proof, but as soon as the wearer gets into the water the lower edges spread out on the surface like a circular lifebelt.

This keeps the upper part of the body erect and clear of the water and the water level.

One of the pockets is fitted with a "baby" wireless transmitting set so that an S.O.S. can be sent out.

Another pocket contains a compass, a third a revolver, and the fourth pocket is packed with foodstuffs.

Miss Bradshaw further claims that she invented 12 years ago a similar system of robot street signals to that which is in use today.

"I was born in New York," she explained, "but came to England when I was quite young."

"I have always been interested in the question of life-saving, whether by shore or at sea. Nearly all my ideas have that object behind them. Financial gain never concerns me."

"According to the family history, I am remotely related, on my grandfather's side, to Edison."

Plants Made Quick Growth

California Yucca Has Record Of Foot Growth In A Day

A foot a day is the record of growth made by two California yucca plants in a well-known American gentleman's garden. They were plucked from seed gathered in the mountains and required nine years to maturity. The fibrous stalks then shot up at a marvellous rate and the white yucca blooms were in full glory within three weeks, remaining so but a few days before beginning to droop. Another such plant, transplanted when quite small, required four years to grow to maturity and attained a height of eleven feet within a little over two weeks.

Fight Was "Official"

Rumor Of Mutiny On British Warship Had No Foundation

Rumors of mutiny on board H.M.S. Hood, the world's largest warship, were set at rest by explanation. Residents of a Scottish seaside village near Invergoran saw the vast bulk of the warship loom up out of the mist, saw launches hurriedly manned and sailors rushed ashore to apply through the surf and start tussling with another party of naval men who had been camped in the sandhills. The "Hoods" men tumbled their opponents into the launches, which sped them back to the warship. The fight was "official" so it was stated.

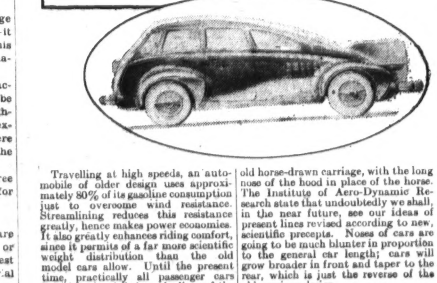

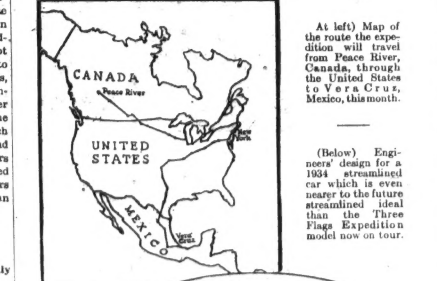

Means Some Cooking

Enormous quantities of food are used in Dr. Barnardo's Homes in London, England. More than 25,000 meals a day have to be provided for 8,450 children. One big item is milk, 1,500 gallons per day being required.

A. M. CAMPBELL, Ltd

Blackfalds Happenings

A skating party was held on Wednesday night, the 22nd, at Peterson's Slough. About twenty people attended and apparently enjoyed themselves immensely, despite Lawrence Martin's puddle in knee deep water.

The W.L. will meet at the Church Hall on Saturday, December 2. The Blackfalds Badminton Club has again been organized for the winter with more than twenty members. Several games have already been played, and it is hoped to send representatives to Red Deer and Lacombe Clubs to compete with the clubs there, very shortly.

During the past month, that branch of the W.L. under Mrs. Jim McKay has been holding feverish rehearsals of a play entitled "The Wild Oats Boy" by Lillian Mortimer. Judging from the hilarity that has attended these preliminary performances, the public is promised an enjoyable evening on Friday, December 1. "Detective Goodwin," disguised as an Irish maid should be worth going a long way to see.

Mr. and Mrs. J. V. N. Miller motored to Calgary the week end before last, and, on their return, Mr. Miller was suddenly taken ill and had to be removed to the Lacombe hospital for a few days. He is back to work again, but will have to take things easy for a time. Their son, Pat, recently came home.

The Rev. Mr. Layton of Lacombe held a service here last Sunday, and after it arranged with the church board to endeavor to hold services here every fortnight, sharing the work with Mr. Whyte Smith of Red Deer, who it is hoped will hold regular Sunday School Services from next Spring. Meantime, the Sunday School Classes will be held every Sunday under the new superintendent, Mr. Hink.

An enjoyable dance was held last Friday night in the Blackfalds Hall; several visitors were noticed from Lacombe and Red Deer.

Miss Hazel Trout visited her parents in Lacombe over the week-end.

THE CHURCH OF ENGLAND IN CANADA

Dioecesis of Calgary
St. Cyriaque's Church, Lacombe
Rector: The Rev. T. H. Chapman
Telephone 165
